

SPACE is an international livestock fair which takes place every year (apart from the Covid-19 crisis) in Rennes in Brittany.

SPACE 2019 welcomed 1,400 exhibitors from 42 countries, and 105,318 visitors including 14,706 international from 122 countries. The 2019 edition was also placed under the sign of the climate (reduction of greenhouse gases, energy production and saving, fitting out of livestock buildings, etc.). This is the reason why the CRAB within the framework of the Erasmus + Planet project had to be there. The CRAB Energy-Climate team therefore made room for us, for one day, on its stand so that we could be visible and answer various questions. This event allowed us to meet farmers in order to let them know about the project. It was also an opportunity to present the outlines of the different training courses (workshop) and to distribute our leaflet presenting the project.
