

Exhibition

TECSOL planned to attend EnerGaïa, European renewable energy Forum during 9th and 10th December 2020 in Exhibition centre of Montpellier.

The objective was to present the PLANET program in its completed form, showing the structure but mostly the work done in full-scale test.

In October 2020, due to the COVID-19 epidemic, SPL OCCITANIE EVENTS, organiser of the EnerGaïa Forum, announced that its 2020 edition, initially scheduled for 9 and 10 December 2020, was cancelled.

The next edition of the EnerGaïa Forum will be held on 8 and 9 December 2021 at the Montpellier Exhibition Centre. TECSOL will present PLANET project in 2021

PLANET

PLANET Plan for Agriculture reNewable Energy Training

The goal for the project is to provide innovative training to farmers who own RES plants or want to invest, with practical and ICT skills in work-based environment related to daily management of the plant. The training will also be available for consultants or students as initial vocational training.
